(+1) CSS  
(Frameworks)

(+1) Salesforce

(+1) .Net (VB)

6 (-2)

**WISDOM**

(+1) AWS

(+1) CI/CD

(+1) Python

(+0) Pizza

12 (+1)

**COMMUNICATION**

(-3) VBA

**SKILLS**

IT'S ME

### QK Services (2016 - Current)

Software Developer

Working as a generalist, providing and implementing solutions for a wide mix of clients. This has lead me to touch and work with a wide range of technologies. With the spectrum ranging from Salesforce to VB.Net, there's few things I'm not happy to do.

Aside from my usual development work, I've helped with project management and hiring. I've even worked on-site with clients when needed!

### Indie Developer (2014 - 2016)

Hey man, everyone tries the indie development at some point. I didn't make it, and got pretty burnt out as a result. But hey, lots of life lessons in that.

I do have some games to share if the opportunity arises though!

### Long Ago (? - 2014)

Just lots of programming...

**PREVIOUS EXPERIENCE**

### GOALS

To work alongside a fantastic team making exciting products that make a difference.

### IDEALS

Programming is an art.  
There's a little bit of fun in everything.

### BONDS

My cassette collection.  
Anything with tactile buttons.

### FLAWS

Gets bored easily. Requires engaging work, otherwise has a tendency to drift off.  
Probably says "heck" too much.

**PERSONAL**

**Location:** Melbourne, Victoria, Australia
