IT'S ME

QK Services (2016 - Current)

Software Developer

Worked on a variety of projects. A language/framework agnostic environment.

Responsibilities included:

- + Designing and implementing solutions.
- + Fixing bugs and providing support for all projects.
- + Maintaining legacy products.
- + Mentoring team members.
- + Communicating progress with clients.
- + Assisting with the hiring process.

Indie Developer (2014 - 2016)

Tried the whole games development thing.

Turns out it's really hard, expensive and draining.

But the failures I had were extremely rewarding in the long run.

PREVIOUS EXPERIENCE

GOALS

To work alongside a fantastic team making exciting products that make a difference.

IDEALS

Programming is an art.

BONDS

My cassette collection.

FLAWS

Gets bored easily. Requires engaging work, otherwise has a tendency to drift off.

PERSONAL

+ What on earth
